RF Industries, Ltd. Purchases Innovative Connector Technology for Braided Cables from JMA Wireless

San Diego, CA -- May 20, 2015 -- **RF Industries, Ltd.** (NASDAQ: RFIL) announces the purchase of the ComPro braided product line (ComPro Product Line) from JMA Wireless. JMA retains all of its compression connector product lines for corrugated cables. The ComPro Product Line utilizes a patented compression technology that offers revolutionary advantages for a water-tight connection, easier installation, and improved system reliability on braided cables. The ComPro Product Line is used by wireless network operators, installers and distributors in North America and other parts of the world. Included in the purchase is inventory, designs, intellectual property, rights to manufacture and sell the ComPro Product Line.

Johnny Walker, CEO/President of RF Industries states "This acquisition expands RFI's braided connector offerings to large telecommunication firms and our current customer base by providing a quality proven, best-in-class patented product."

Shawn Chawgo, VP of Product Management at JMA Wireless said, "Within our broader line of corrugated connector and jumper products we felt this connector series for LMR type braided cables did not fit with our current customer base and direct selling model. It better aligns with a distribution oriented model and customer base that RF Industries services very well."

About JMA Wireless

JMA Wireless is the leading global innovator in mobile wireless connectivity solutions that assure infrastructure reliability, streamline service operations, and maximize wireless performance. Employing powerful, patented innovations their solutions portfolio is proven to lower the cost of operations while ensuring lifetime quality levels in equipment and unrivaled performance for coverage and high-speed mobile data.
