

FOR IMMEDIATE RELEASE

Save Capital Equipment Costs with Factory Terminated RF Coaxial Corrugate Jumper Cables with JMA Wireless Compression Connectors

JMA Wireless Compression connectors are industry leading solutions. Innovative and patented, network infrastructure partners demand these connectors to eliminate PIM (passive intermodulation) and improve signal performance. The JMA Wireless Compression connectors offer unmatched performance and reliability with redundant moisture seals and mechanical stability. Proper cable attachment and PIM testing require high capital investment for installation and test equipment. For some, the ROI is not justified.

RF Industries provides RF coaxial corrugated jumper cables with JMA Wireless Compression connectors manufactured to specific requirements and applications. Corrugated cable brands include: CommScope/Andrew, RFS, Superior Essex, HUBER + SUHNER, Rosenberger, Eupen, Trilogy, Hansen, NK Draka, Leoni, Times Microwave. Cable sizes and materials include: ¼ inch, ½ inch, annular, super-flexible, air dielectric, foam dielectric and plenum rated. Jumper cable assemblies can be manufactured to any length and terminated with any JMA Wireless Compression connectors.

RF Industries tests 100% of low PIM cables using the latest test equipment and methodologies including static and dynamic conditions. Cables are serialized with the test results digitized and available for download using the PIMTracker™ application on our web site.

Optional JMA Wireless WPS™ (Weather Protection System) is available.

About RF Industries

RF Industries designs and manufactures a broad range of interconnect products across diversified, growing markets including wireless/wireline telecom, data communications and industrial. The Company's products include [RF connectors](#), [coaxial cables](#), [wire harnesses](#), [fiber optic cables](#) and [custom cabling](#). The Company is headquartered in San Diego, California with operations in New York, Connecticut and New Jersey. Please visit the RF Industries website at www.rfindustries.com.
