

## RF Industries Offers Flexible Cable Assembly Alternative to ½ Inch Corrugated

For most wireless network installations, ½ inch corrugated cable assemblies are used for short antenna feeder runs. Times Microwave LMR®-600 braided cables offers similar attenuation with improved flexibility, resistance to kinking and lower cost. RF Industries manufactures cable assemblies using LMR®-600, terminated with 7-16 DIN connectors. The connectors may be configured in straight or right angle at the time of manufacture.

Connectors are constructed with silver plated brass bodies. The assemblies are built to order in custom lengths.

Available from RF Connectors distributors throughout the US, Canada and Mexico. For additional information contact us at 800-233-1728 or 858-549-6340, [rfi@rfindustries.com](mailto:rfi@rfindustries.com) or visit our web site at [www.rfindustries.com](http://www.rfindustries.com). RF Connectors is a division of RF Industries (NASDAQ RFIL), a leading supplier of connectivity solutions provided through its operating divisions: RF Connectors, RF Cable Assembly, Aviel Electronics, OddCables.com and Cables Unlimited.
