

FOR IMMEDIATE RELEASE

RF Coax Cable Assemblies with Slide-On Weather-Proof Boots for Fast and Easy Installation

For outdoor installation of RF coaxial cable assemblies, there are numerous methods to weather-proof the connection point. Most are time consuming, expensive or difficult to install. RF Industries offers a quick and easy solution with slide on weather-proof boots. The boots come preassembled on the cable assemblies. Simply slide the boot over the mated connectors. Once the connection is fully covered, the boot provides a weather proof seal that meets IP68 rating.

RF Industries offer the slide-on weather-proof boot preinstalled on cable assemblies

manufactured with various brands of ½ and ¼ inch corrugated cables. Connectors include 7-16 DIN male, 4.3-10 male and N male. Assemblies are manufactured to order in the United States for quick deliver. PIM testing is available with each serialization of each cable and test results downloadable with the PIM Traker™ application on our web site: www.rfindustries.com.

About RF Industries

RF Industries designs and manufactures a broad range of interconnect products across diversified, growing markets including wireless/wireline telecom, data communications and industrial. The Company's products include [RF connectors](#), [coaxial cables](#), [wire harnesses](#), [fiber optic cables](#) and [custom cabling](#). The Company is headquartered in San Diego, California with operations in New York, Connecticut and New Jersey. Please visit the RF Industries website at www.rfindustries.com.
