

# CONCEALMENT POLE MOUNTING OPTIONS

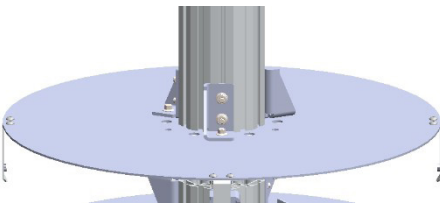

RF Industries offers several pole mounting options for TruField®, a first of its kind, patent protected, tensioned fabric concealment solution. TruField offers true RF signal transparency. It is band agnostic and enables multi-operator and neutral host business models.

All RF Industries' pole mounting options are carefully designed, structurally analyzed and tested per our stringent quality and reliability standards. Can't find what you need? We can help by providing solutions to interface with any pole diameter or mounting method. We will analyze and design a new system to your precise specifications.

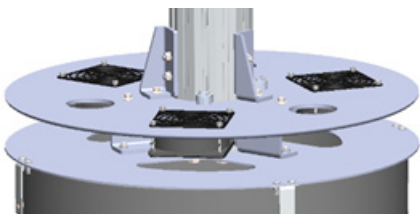

## POLE MOUNT BRACKET ASSEMBLY

- Standard extrusion needed
- Tall bottom cap needed
- 6" to 10.5" diameter poles
- Compatible with hollow, flat top, solid, and wood poles
- Non-tilt

- Large Extrusion needed
- Flat Top 13"+ Poles
- Non-Tilt

## ABOUT RF INDUSTRIES

RF Industries (RFI) provides a portfolio of small cell concealment products and integrated solutions to facilitate the rapid deployment of 4G and 5G infrastructure along with the flexibility and creativity to meet the most challenging small cell deployments.

Our high-touch customer approach allows us to be responsive, accessible and hands-on when needed, every step of the way. Unlike large organizations, you will always be our number one priority. Our end-to-end support promises personal attention, guidance, and partnership all the way through site deployment.

RFI's unique flexibility also gives us a competitive advantage. As an agile business, we are able to identify and react to challenges quickly and easily, resulting in a smoother overall customer experience.
