

High Quality Fiber Optic & Copper Cables

RF INDUSTRIES SOLUTIONS

Custom Cable Assemblies Are In Our DNA

For over 30 years, RFI has been dedicated to manufacturing and delivering reliable, quality connectivity solutions. Our highly trained staff employs years of industry experience to address custom build requirements, while meeting client manufacturing and shipping expectations. We deliver on our promise to provide solutions to all of your custom fiber optic and copper cable needs.

QUICK TURN PROGRAM

Program Highlights

Installation delays become a thing of the past with our Quick Turn Fiber & Copper Program, designed to ship most configurations of our high-quality jumpers and assemblies within 1 week. The program revolves around several key initiatives designed to ensure high quality, short lead times and a Lifetime Warranty – if an assembly fails in the field, we will replace it at no charge.

Inventory Stocking Program

Our Inventory Stocking Program works directly with our customers to stock the necessary fiber, copper, connectors and components to support our Quick Turn lead time service level agreements.

Dedicated Capacity

Our two dedicated fiber assembly facilities, strategically located on the east and west coasts of the USA, give us the ability to allocate portions of production capacity to support and fulfill the lead times required by our customers. We employ best-practice packaging and shipping methods to ensure the lowest shipping costs.

ASSEMBLED & TESTED IN THE USA

WHY CHOOSE RF INDUSTRIES

Corning Gold Program

Thanks to our exclusive licensing agreement with Corning Optical Communications, we're proud to offer a comprehensive range

of Corning-compatible products with Quick Turn lead times. We ship these high-quality fiber jumpers and assemblies in one week or less. With Corning Gold Certified Assembly Houses on both the east and west coasts of the U.S., we are fully equipped to meet the requirements and service level agreements set in place by our Fiber Quick Turn Program. Inventory stocking and dedicated capacity at each location will ensure satisfactory delivery on our promises.

We Can Deliver Exactly What You Need

- High quality, short lead times and a lifetime warranty
- Two locations (NY, CA) with coast-to-coast coverage
- Fiber to the Antenna (FTTA) and Hybrid Cable solutions
- Field-proven Corning compatible OptiTip® and OptiTap® wireless assembly series deliver consistent reliable performance
- TAA compliant category patch cables – UTP, STP, Cat6A, Cat6E, Cat6, Cat5E, CMP, CMR in custom lengths and colors.
- Legacy and other copper assemblies available including RS232, DAS, T1
- High flexibility industrial copper assemblies assure a reliable Ethernet connection in harsh environments.
- Slimline “mini” CAT6 28 AWG patch cords for high density deployments in all colors and lengths
- Custom patch cord bundles in leg counts from 2 to 72 with sleeving and wrap options.
- Transceivers manufactured for Storage Area Networks (SANs), High Speed Switches and Network Attached Storage (NAS)
- OEM and proprietary custom-built cables that meet all specified requirements
