

FAST FACTS: DIRECT AIR COOLING

TRANSFORM YOUR WALK-UP TELECOM
CABINETS WITH THE DUALXCHANGE
THERMAL MANAGEMENT ECOSYSTEM

FACT 1

250W vs. 3kW

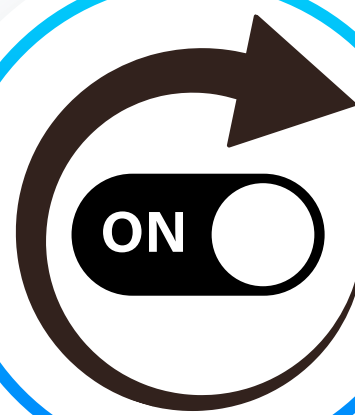

Lowers operational costs by reducing power consumption at the site and qualifies for green initiatives.

FACT 2

DC Powered

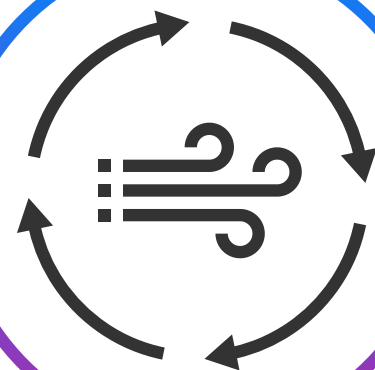

Provides effective backup cooling for walk-up cabinets, ensuring operation during power outages or service interruptions.

FACT 3

Lowers HVAC Usage

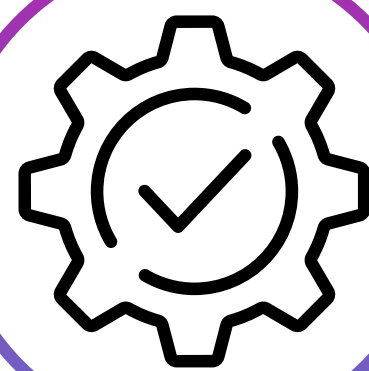

Reduces the need for site visits, lowers maintenance requirements, and prolongs the lifespan of HVAC systems.

FACT 4

Easy to Maintain

Unlike HVAC, it doesn't require a licensed technician for service. Cleaning and/or filter replacement is recommended only once a year.

BONUS: REAL TIME SITE MONITORING

Sensors collect data on site operations and heat patterns, enabling analysis to provide accurate recommendations for maintenance, automation, and improvements.
